

Assignment Sheet

Task 1 – Divisibility

(10 Points)

Write a program that checks if an unsigned integer is divisible by 2 and 5. To receive full points you may **not** use any branches or jumps. Make sure to document your code using comments ('#').

Input:

In t0: number to check (unsigned integer)

Output:

In t0: A binary value consisting of 32 ones if the integer is divisible by both numbers, any other number otherwise

Hint: This task can be solved by using only *li*, *remu* and two logical instructions.

This assignment is due on 28.11.2025 at 10 am.
